DIGITAL LITERACY PROJECT REPORT

Name: Sambit Kumar Garanayak

Registration Number: 25BCE11252

Branch: B.Tech, Computer Science and Engineering

Institution: VIT Bhopal University

Course Code: CSE0001 - Digital Literacy

INTRODUCTION :

This project was completed as part of the Digital Literacy course (CSE0001). The objective of this project is to understand the importance of digital tools, online safety, and professional communication. As a student, it is important to build a responsible digital presence and use technology effectively. Through this project, I explored various platforms and activities that contribute to digital awareness and practical skills.

TASK 1: DIGITAL LITERACY INFOGRAPHIC

For this task, I created an infographic using Canva to explain the concept of digital literacy. The infographic includes topics such as safe internet practices, useful digital tools, and basic email etiquette. The aim was to present information in a simple and visually clear format. While working on this task, I learned how to organize content effectively. One challenge I faced was keeping the design simple while including all important points.

TASK 2: DIGITAL PORTFOLIO

In this task, I created and updated my profiles on GitHub, LinkedIn, and Kaggle. Each platform serves a different purpose. GitHub is used to showcase projects and coding work, LinkedIn helps in building a professional network, and Kaggle is useful for learning and practicing skills. This task helped me understand the importance of maintaining a professional online identity. I plan to continue updating these platforms with my future work and achievements.

TASK 3: PLATFORMS EXPLORATION

For this task, I explored coding and collaboration platforms. I completed a beginner-level problem on HackerRank, which helped me practice programming skills. I also created a Google Form based on digital literacy awareness. This activity helped me understand how online tools can be used for learning, testing, and collaboration. It also improved my confidence in using such platforms.

TASK 4: EMAIL ETIQUETTE

In this task, I wrote two professional emails based on real-life situations and created a checklist for responsible social media usage. I learned the importance of using a proper format, polite language, and clear communication in emails. I also understood how improper communication can lead to misunderstandings and problems.

TASK 5: CYBERCRIME AWARENESS

In this task, I worked on a case study related to phishing and created a prevention checklist. I learned how cybercrimes occur and how people can be targeted through simple mistakes. This task increased my awareness about online threats and the importance of being careful while using digital platforms.

CONCLUSION :

This project helped me gain a better understanding of digital literacy, online safety, and professional communication. It also helped me learn how to use digital tools effectively and responsibly. Overall, this project was useful in building my awareness and preparing me for future academic and professional activities.
